

# Moment

## Description

Moment is an iOS app that allows users to login with their twitter account. Once logged in, the user should be able to search for any TV show. After locating their desired show, they should be able to dive deeper into the shows detailed information. They should also be able to keep track of their favorite TV Shows using a list.

## Domain

A user starts the app; they are presented with a screen requesting for twitter authentication if they are not already logged in. Once logged in, the user is shown their "moment" profile. This include their profile pic from twitter, a list of their favorite TV Shows and the other members they're following/followed by. Clicking on other members names will reveal their profile page in a read-only format. The next tab is the "search" screen which allows the user to search for any TV show. Once found, selecting the desired show will present the user with a show "details" page. The user is also able to view a shows "details" by clicking on the show from their list of shows on the profile tab. The show "details" page will include an banner image of the show, a status tag that reveals if the shows is currently "on-air", "concluded" or "canceled". There will also be a area to view the number of seasons the show has and the title of individual episodes within each season. The third tab will display shows that are trending, popular or similar to those in the users list.
